Resume objective

Experienced and self motivated UX-Developer with 9 years experience in the industry creating accessible design systems and webapps while working with React.js/Typescript and Styled Components/AxeCore/Pa11y. Results oriented with a track record of developing quality User Experiences based from UX designer wireframes/prototypes and Figma designs/annotations. Experienced in conceptualizing, designing and developing customer facing design systems using Storybook, Rollup.js, Webpack and writing automation engineering tests with Cypress.io. Certified Cloud Practitioner Amazon Web Services (AWS).

Work experience

UX-Developer

Dec 2017 - Present

Indeed, Remote

Designed and developed and internal design system using Rollup.js/webpack/React.js/Typescript. Worked with UX-Designers to conceptualize, iron out possible issues early on in the design system creation lifecycle. Designed and developed customer facing webapps, internal facing web apps and software using React.js/Typescript and styled components. Front-end developer/UX-Developer that has worked on 12 different projects during the current tenure at Indeed. Created Journey maps for product and user centric needs which helped outline successful product lifecycle road maps. Fielded individual requests for new UI features, prioritized them, scoped them down to story pointed tasks using Jira and Confluence. Autonomously worked on projects and helped outline possible new UX project work for the internal UX team. Designed and developed webapp for teaching how to use the programmatic AXE Core and Pa11y accessibility technologies. integrated those technologies into the build and development process to help catch Accessible programmatic issues before the next phase of functional and outside user testing.

Sr. UX Designer/UX-Developer

Jun 2017 - Nov 2017

General Motors, Austin

Contracted Sr. UX designer and UX developer tasked with helping develop an internal design system using HandleBars.js. Worked very closely with the UX Designer to outline design system requirements and patterns which could improve product adoption and improved sales using Adobe XD. Helped document design patterns in a living design document which resulted in a live webapp that showcased the design system components and how to use them.

UX-Developer/Designer

Feb 2017 - Mar 2017

Advanced Micro Devices (AMD), Austin

Contracted UX-Developer/ UX Designer tasked with Designing and developing the customer facing product webapp showcasing the release of the RYZEN CPU. Taught corporate UX-Designers/UX-Developers how to program and work with DRUPAL. Wrote custom jQuery code for cross browser compatibility within the DRUPAL ecosystem and templating pages. The webapp was released on time to a global audience.

UX-Developer II

Feb 2015 - Aug 2016

MyMatrixx, Austin

Designed and developed quality prescription and medical equipment software for the internal sales and

customer service team to use during their day to day work. Designed feature request design patterns. Documented design interactions using Adobe XD and exporting those into PDF format. Developed the new features for the application using hand coded HTML5/CSS3/jQuery.

UX-Developer

Mar 2013 - Feb 2015

Texas.gov the official state website of Texas, Austin

Started as a UX-Developer intern working on the client facing webapps for the Vehicle Inspection process software for all inspection stations to use in the state of Texas. Moved into a full time UX-Developer position after finishing the internship. Designed and Developed website prototypes and complex interactions using Adobe Photoshop and Adobe Illustrator. Designed and developed Nationally Award winning Texas.gov official website (5th place) from the Center for Digital Media in 2013 state E-government category. Designed and developed Nationally Award winning Texas.gov official website (4th place) from the Center for Digital Media state E-government category in 2014. After moving to a different company, the same website that I designed in 2014 won a Best of Web award (3rd place) from the Center of Digital Media state E-government category.
